Where We Are

We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

PROSO The WONDER EGG and Meat PRODUCING Poultry Grain

Do not confuse this Proso with common hog millet. Proso seed is white, and larger grain. Hog millet is yellow. Here is a new Poultry Grain that owes its origin to Russia, that enables you to raise your own feed. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet, stools and branches making fifteen to twenty-five heads instead of one. Wonder Egg and Meat Producer for Chickens, Ducks and Geese. Proso makes a splendid mash when ground alone. When feeding with corn or oats the ration should be four parts Proso to one other grain. It may be fed in handfuls as the kernels are readily scratched out of the heads, or it may be fed as clean grain from the trougher. Produces more eggs and meat per bushel than ordinary grains.

Fine for Hogs, Cattle, Sheep. Grows anywhere. May Be Planted Late. Although a native of Russia, Proso does better, grows faster and matures quicker in our climate. During the fifteen years since it was first introduced into this country it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

Arkansas Stone Fruit Nursery Stock is VIRUS-FREE

Our stone fruits are grown under the vigilant eyes of the inspectors of the Arkansas State Plant Board in a region free from virus diseases, making it by far the safest and best nursery stock for you to buy.

Virus diseases such as "Peach Yellows," "Phony Disease," "Peach Mosaic," and "Little Peach Disease" have ruined thousands of valuable peach orchards and practically wiped out the peach industry in certain peach-growing areas. These diseases are established in orchards by means of a few diseased trees in shipments of nursery stock and when planted these diseases spread from tree to tree by insects. The only control meas-

ures so far available are the destruction of the trees and planting of new trees grown in regions free of these diseases. Don't take any chances by ordering trees that might be infested with these diseases. ALL OF OUR STONE FRUIT NURSERY STOCK IS GUARANTEED COMPLETELY FREE FROM VIRUS DISEASES AND IS THEREFORE THE BEST AVAILABLE FOR PLANTING IN ANY OF THE FRUIT-GROWING AREAS IN THE UNITED STATES. BE SAFE AND ORDER STOCK GUARANTEED VIRUS-FREE. DON'T RISK THE LOSS OF YOUR ENTIRE ORCHARD.
